

Business Requirement Document (BRD)

Project Title

Pharma Sales Force Effectiveness Analytics System

1. Business Context

Pharmaceutical companies generate large volumes of sales, physician, territory, and marketing data on a daily basis. Management teams often struggle to convert this raw data into actionable insights that can improve commercial performance.

The organization requires an analytics solution that enables stakeholders to monitor sales performance, evaluate sales representative effectiveness, identify high-value physicians, measure marketing ROI, and support strategic decision-making through data-driven insights.

The proposed Pharma Sales Force Effectiveness Analytics System will provide centralized reporting and analytics capabilities to improve business performance and resource allocation.

2. Business Problem Statement

The company currently faces the following challenges:

- Difficulty identifying high-performing and underperforming territories.
- Limited visibility into sales representative productivity.
- Inability to identify physicians generating maximum prescriptions.
- Challenges in measuring marketing campaign effectiveness and ROI.
- Lack of centralized reporting for commercial performance monitoring.

As a result, management cannot make timely and data-driven decisions regarding territory planning, physician targeting, and marketing investments.

3. Business Objectives

Objective 1: Improve Territory Performance

Identify high-performing and underperforming territories to optimize resource allocation.

Objective 2: Improve Sales Force Effectiveness

Measure sales representative productivity and target achievement.

Objective 3: Identify High-Value Physicians

Analyze physician prescribing behavior to identify key contributors.

Objective 4: Optimize Marketing Investments

Measure the effectiveness and ROI of marketing spend across territories.

Objective 5: Enable Data-Driven Decision Making

Provide business stakeholders with actionable insights through dashboards and reports.

4. Project Scope

In Scope

- Territory performance analysis
- Sales representative performance analysis
- Physician prescription analysis
- Product performance analysis
- Marketing ROI analysis
- KPI reporting and dashboard creation
- Interactive business intelligence dashboards

Out of Scope

- Demand forecasting
- Inventory management
- Supply chain optimization
- CRM implementation
- Customer support operations
- Financial accounting processes

5. Stakeholders

Stakeholder	Responsibility
Sales Managers	Monitor territory and sales rep performance
Commercial Analytics Team	Analyze KPIs and generate insights
Marketing Team	Evaluate campaign effectiveness and ROI
Leadership Team	Strategic decision making
Business Analyst	Requirement gathering and reporting

6. Data Sources

Source	Description
Sales Data	Revenue and sales transactions
Physician Data	Doctor information and prescription details
Territory Data	Regional and territory mapping
Marketing Data	Marketing spend and campaign information
Product Data	Medicine and product information

7. Business Requirements

BR-01 Revenue Analysis

The system shall provide:

- Revenue by Region
- Revenue by Product
- Revenue Trends over Time
- Top Performing Territories

BR-02 Sales Representative Analysis

The system shall provide:

- Sales Rep Productivity Analysis
- Target Achievement Analysis
- Performance Rankings
- Territory-wise Rep Comparison

BR-03 Physician Analysis

The system shall provide:

- Physician Segmentation
- Prescription Volume Analysis
- Specialty-wise Analysis
- High-Value Physician Identification

BR-04 Marketing Effectiveness Analysis

The system shall provide:

- Marketing Spend Analysis
- ROI Measurement
- Campaign Performance Analysis
- Territory-wise Marketing Effectiveness

BR-05 Dashboard Reporting

The system shall provide:

- Interactive Dashboard
- KPI Monitoring
- Dynamic Filters
- Executive Summary Reports

8. Key Business Questions

1. Which territories generate the highest revenue?
2. Which sales representatives exceed their targets?
3. Which physicians generate the highest prescription volume?
4. Which medicines contribute most to revenue?
5. Which regions provide the highest marketing ROI?
6. Where should management allocate additional resources?
7. Which territories require performance improvement initiatives?

9. Key Performance Indicators (KPIs)

Revenue

Definition:

Total sales generated.

Formula:

Revenue = Units Sold × Unit Price

Achievement Percentage

Definition:

Measures target accomplishment by sales representatives.

Formula:

Achievement % = (Actual Sales ÷ Target Sales) × 100

Prescription Volume

Definition:

Total prescriptions generated by physicians.

Formula:

Prescription Volume = Sum of Prescriptions

Marketing ROI

Definition:

Measures effectiveness of marketing investments.

Formula:

ROI % = Sum(Revenue) / Sum(marketing_spend)

Revenue by Territory

Definition:

Revenue generated by each territory.

Formula:

Revenue by Territory = Sum of Revenue by Region

Rep Productivity

Definition:

Measures sales generated by each representative.

Formula:

Rep Productivity = Revenue ÷ Number of Sales Calls

10. Business Challenges

Challenge 1

Large volumes of data make manual analysis difficult.

Challenge 2

Performance varies significantly across territories.

Challenge 3

Physician contributions differ substantially.

Challenge 4

Marketing budgets must be optimized for maximum ROI.

Challenge 5

Continuous monitoring of sales performance is required.

11. Assumptions

- Sales data is accurate and complete.
- Physician identifiers are unique.
- Marketing spend data is available for analysis.
- Historical data is available for the selected reporting period.
- Product master data is maintained correctly.

12. Success Criteria

The project will be considered successful if:

- Management can identify top-performing territories.
- Sales representative performance can be monitored monthly.
- High-value physicians can be identified accurately.
- Marketing ROI can be measured across territories.
- Dashboard reports are available for decision-making.

- KPI reporting is automated and accessible.

13. Business Impact

Area	Impact
Territory Planning	Better resource allocation
Sales Force Management	Improved productivity
Physician Targeting	Higher prescription generation
Marketing Optimization	Better ROI
Leadership Reporting	Faster decision-making

14. Expected Business Benefits

- Improved Territory Management
- Increased Sales Force Productivity
- Better Physician Targeting
- Optimized Marketing Spend
- Faster Decision Making
- Enhanced Commercial Performance
- Improved Business Visibility

15. Risks & Constraints

- Incomplete sales data
- Incorrect physician mapping
- Missing marketing spend records
- Delayed data refresh
